## **The Climate Debate Continues!**

**Rising Sea Level Forecast: Fact or Fiction?**

**Presenter: Professor Cliff Ollier, UWA**

**&**

**Perth Book Launch of “Twilight of Abundance” - Effects of Global Cooling**

**Presenter: David Archibald, Perth Author and Scientist.**

**When:** Monday 26th May 2014.

**Time:** 7.00pm for 7.30pm Start.

**Where:** Royal Perth Yacht Club, Australia 11 Drive, Crawley

### **Rising Sea Level Forecast: Fact or Fiction?**

The City of Joondalup has released a draft coastal planning policy and the City of Rockingham is about to do likewise with their policy this month to accommodate forecasted sea level rises. How real is the rising sea issue and what cost burden is this likely to be to landowners?

Are the bureaucrats resorting to alarmism? Is the insurance industry complicit in promoting a non-event for higher premiums at negligible risk?

**Professor Ollier** will use local, national and international examples and provide some clarity in this debate.

**&**

### **Twilight of Abundance: The Effects of Global Cooling.**

David Archibald has just returned from the American release of his book, “**Twilight of Abundance - Why Life in the 21<sup>st</sup> Century Will be Nasty, Brutish and Short**”, where he lectured on issues it covers in more than a dozen radio and TV interviews broadcast across the United States.

David will outline the impact of the Solar Cycles 24 and 25 and his predictions to AD2040.

This presentation is also the launch of his book in his home town. Regardless of your assumptions about the climate change industry David will challenge these.

Warming or cooling? The climate change challenge ahead!

**David Archibald** will be making his book available for sale.

**Questions welcomed after conclusion of presentations**

**The CNI is non-party political and aims to build a better Australia for future generations.**
